

	<i>behavior is reflected in the learned profile.</i>	
<i>Bonus</i>	<i>Correctly implemented machine learning method and sound comparison and conclusion.</i>	<i>0-5 points</i>
<i>Report and code</i>	<i>The data-detection flow is clearly described, including preprocessing and post-processing steps.</i>	<i>0-5 points</i>
<p><i>Your total score will be determined by summing up the points assigned to the individual criteria, and averaging to account for the number of peer reviews. In total 35 points can be obtained in each course assignment, the total number of obtained points will be divided by 90 to determine the final grade. In case one of the reviews is significantly worse than (at least 10 points difference) the others, this review score is not taken into account.</i></p> <p><i>You will receive a penalty of 5 points for each peer review not performed.</i></p> <p><i>Significantly different reviews will be subject to investigation. If deemed badly done by the teacher or TA, you will also receive 5 penalty points.</i></p>
